The disclosure is objected to because of the following informalities: the specification on page 1 fails to state that this case is a 371 of PCT/JP04/09861.

Appropriate correction is required.

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

Claims 1-3 are rejected under 35 U.S.C. 102(b) as being anticipated by Baroody et al (U.S. Patent No. 5,733,886).

Art Unit: 1623

Baroody et al disclose the claimed compositions comprising clindamycin (column 2, lines 37-39).

Claims 1-6 are rejected under 35 U.S.C. 103(a) as being unpatentable over Eishi et al (Journal of Clinical Microbiology, Jan. 2002, pages 198-204) in combination with Baroody et al (U.S. Patent No. 5,733,886).

Eishi et al disclose that sarcoidosis is caused by Propionibacterium. Baroody et al disclose that clindamycin is effective against Propionobacterium (column 2, lines 37-39). Therefore, it would have been prima facie obvious to a person having ordinary skill in the art at the time the claimed invention was made to treat sarcoidosis caused by Propionibacterium with clindamycin.
